[illegible]

SIR:

Petitioners, (1) Bill L. Davis, residing at 1126 Tipton Road, Irving, Texas 75060; and (2) Jesse S. Williamson, residing at 5738 Caruth, Dallas, Texas 75209, and being both United States citizens, declare that:

1. We verily believe ourselves to be the original, first and joint inventors of the invention described and claimed, and of the discovery described, in U.S. Patent 5,630,363 and in the specification thereof, and for which invention and discovery we solicit a reissue patent. We affirm the statements made in our original Reissue Declaration filed May 20, 1999, for which we have further amended the specification and claims.

2. Petitioners verily believe that, because of what might be deemed errors in the specification and claims of U.S. Patent 5,630,363, that said '363 patent might be inoperative or invalid (a) by reason of Petitioners claiming in some instances more, and in some instances less,

0315746 032509

than they had a right to claim in the '363 patent, or (b) for the reason that the '363 claims might be interpreted as failing to particularly point out and distinctly claim the subject matter which the undersigned Petitioners regard as their invention. There also exists certain errors in the specification including, but not limited to, minor stenographical errors. Petitioners declare that all of these errors sought to be corrected arose through their unfamiliarity with U. S. patent practice, and/or through inadvertence, and were all without any deceptive intention. Specifically Petitioners declare that all errors being corrected in this reissue application up to the filing of this oath and their original oath, and the amendment submitted herewith on March 9, 2000, respectively, all arose without any deceptive intent. Petitioners seek to correct these errors through amendments to their specification and claims, and endorse the amendments set forth in Exhibit "A" hereto.

3. Petitioners are informed that under 37 C.F.R. § 1.56(a) that a duty of candor and good faith toward the United States Patent and Trademark Office ("Office") rests on the inventors, on each attorney or agent who prepares or prosecutes the application and on every other individual who is substantively involved in the preparation of prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application. Reissue petitioners are now further aware that all such individuals have a duty to disclose to the Office information that each is aware of which is material to the examination of the application and that such information is material where there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent. Reissue petitioners further understand that the duty is commensurate with a degree of involvement in the preparation or prosecution of the application. Reissue petitioners are now informed that the duty of disclosure may extend to their own activities prior to the filing date of the application leading to the '363 patent.

4. Petitioners further declare that their '363 patent specification teaches a combined lithographic/flexographic process having a plurality of successive printing stations for depositing

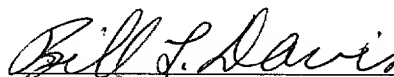

650320 76/4 660

application in accordance with 37 C.F.R. §1.56(a). We further declare that we do not know and do not believe that said invention was ever known or ever used in the United States of America before my invention thereof, or patented or described in any printed publication in any country before my invention thereof, or patented or described in any printed publication more than one year before the filing date of the first application leading to the '363 patent; or in public use or on sale in the United States of America more than one year prior to the date of the first application leading to the '363 patent; further, that said invention has not been patented or made the subject to any inventor's certificate issued before the filing date of the first application leading to the '363 patent in any country foreign to the United States of America on any application filed by me or our legal representative or assigns more than twelve (12) months prior to the filing date of said first patent application in the United States of America, and has not been abandoned.

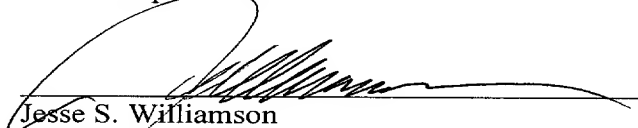

The undersigned Petitioners declare further that all statements made herein of Petitioners' own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application of any reissue patent issuing thereon.
